

KLOVE serves the needs of the residential community of Phoenix by providing positive, encouraging, commercial-free radio. The stations (105.5, 89.1, and 100.9) fosters uplifting radio which cannot be found on any other stations. If KLOVE were to be displaced by an LPFM broadcaster, there would be a great void in the Phoenix Metro area for contemporary Christian radio. KLOVE supports wholesome values and has a positive and encouraging impact on this community. KLOVE serves the public interests through providing quality family-friendly programming that I have not found in any other stations. In a time of global turmoil and uncertainty, there is great value both nationally and regionally for services, such as KLOVE, that provide positive, wholesome, and uplifting programming, which is often heard on FM translators. The public interest in these KLOVE stations can be seen through the public financial support of the listener supported stations. Therefore, it is imperative to the patrons of the KLOVE stations and the nation as a whole that the FCC not displace KLOVE by an LPFM broadcaster.
